

System 99 Self-Raising/Lowering System

FrenchCreek's system 99 is a versatile lifting and lowering system that can be used for utility/work systems or for rescue & recovery. The lightweight, compact universal system can be set up in seconds and performs a variety of functions.

- Mechanical advantage of 3:1, makes system easily operated by one person
- A top side worker can utilize the system to rescue an incapacitated worker
- Lightweight design, 200 ft long system approx. weight: 52 lbs.

FALL SAFETY

Because your life is on the line

Remote Prompt Rescue

RPR Kits

Time is one of the most valuable assets in any emergency. In an ideal situation, a trained, qualified co-worker can immediately assist another worker in the event of a fall. This system allows a capable worker to attach a raising/ lowering system to the fallen worker's D-Ring, providing a means for rescue.
