Wherever The Winds Blow, FrenchCreek Fall Safety Will Be There

With 35 years of experience in fall protection manufacturing, the team here at FrenchCreek Fall Safety has come to know a great deal of the challenges workers face out in the field. We've seen over three decades of industry shifts, technical developments, and lifesaving innovations.

To make sure you and your team make it home safe every day, we tailor our designs to fit the needs of those who use our equipment. We don't just make a one and done product. We design, test, and implement specialized gear to fit the needs of dozens of industries.

We see the unique challenges the wind energy industry faces and aim to meet them head on. From custom harnesses to adaptive solutions to anchorage, connection, and rescue needs, it is our goal to ensure the maximum level of fall protection is available. As the industry adapts to new technologies and infrastructure, we're working to ensure fall protection evolves as well.

When pushing the boundaries of clean energy means pushing the boundaries of fall protection, safety professionals choose FrenchCreek Fall Safety for our dynamic safety solutions.
